

FOR OFFICIAL USE.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 1. Week ending SATURDAY, JANUARY 7, 1922. Price 2d. net.

The Weekly Reports of last year included statistical detail of the Fifteen principal towns. This Report deals with Sixteen towns, the difference being the inclusion of Dunfermline, which at the recent Census had a population of more than 30,000.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 7th January 1922 the births of 1264 living children, the deaths of 879 persons, and 1261 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 850. The equivalent annual birth-rate is 27·8, and the death-rate, corrected, 18·7 per thousand.

The birth-rate for the week is 0·9 more than that of the previous week, and 1·4 more than the mean of those of the three preceding weeks, but is 3·9 less than that of the corresponding week of last year. The death-rate for the week is 3·4 more than that of the previous week, and 4·1 more than the mean of those of the three preceding weeks, but is 0·7 less than that of the corresponding week of last year.

In the individual towns the death-rate ranged from 37·9 in Perth, 22·6 in Glasgow, and 19·7 in Kirkcaldy, to 7·7 in Clydebank, 9·0 in Motherwell and Wishaw, and 11·0 in Paisley and in Falkirk. In Greenock this rate was 19·1, in Dundee 19·0, in Kilmarnock 17·4, in Aberdeen, 16·8, in Dunfermline 15·3, in Edinburgh 15·0, in Ayr 14·5, in Coatbridge 13·0, and in Hamilton 11·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 71. They are 3 more than in the previous week, and are equal to a death-rate of 1·6 per thousand. These deaths include 37 from measles, 4 from scarlet fever, 11 from whooping-cough, 6 from diphtheria, and 13 from the diarrhoeas of childhood.

Deaths from influenza numbered 42, and those from respiratory diseases 193.

Deaths of children of less than one year old numbered 153, and those of persons of sixty-five and upwards 242.

Deaths attributed to violent causes numbered 27.

The inclusion of the sixteenth town noted above prevents comparison between the foregoing numbers and those of the previous year.

The mean temperature for seven of the towns named in the Table was 39°·2, being 2°·2 below that for the previous week, and 3°·1 below that for the corresponding week of last year. The mean rainfall was 0·79 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 2. Week ending SATURDAY, JANUARY 14, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 14th January 1922 the births of 1298 living children, the deaths of 1224 persons, and 349 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1216. The equivalent annual birth-rate is 28·6, and the death-rate 26·7 per thousand of the estimated aggregate population.

The birth-rate for the week is 0·8 more than that of the previous week, 1·6 more than the mean of the rates for the three preceding weeks, and 2·6 more than that of the corresponding week of last year. The death-rate for the week is 8·0 more than that of the previous week, 10·6 more than the mean of the rates for the three preceding weeks, and 9·9 more than that of the corresponding week of last year.

The high death-rate of the week is associated with the marked increase in the number of deaths attributed to influenza, and to the number attributed to diseases of the respiratory system.

In the individual towns the weekly death-rate, corrected, ranged from 50·6 in Perth, 42·1 in Kirkcaldy, 34·9 in Glasgow, and 30·5 in Dundee, to 4·4 in Kilmarnock, 10·1 in Ayr, and 13·2 in Hamilton. In Falkirk this rate was 23·5, in Coatbridge 22·5, in Edinburgh 19·1, in Aberdeen 18·7, in Paisley 16·0, in Clydebank 15·4, in Dunfermline 15·3, in Greenock 14·7, and in Motherwell and Wishaw 14·3. Compared with the returns of the previous week, the death-rate in Kirkcaldy shows a rise of 22·4, that in Perth one of 12·7, in Falkirk 12·5, in Glasgow 12·3, and in Dundee 11·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 106. They are 35 more than in the previous week, and are equal to an annual death-rate of 2·3 per thousand. These deaths include 1 from enteric fever, 63 from measles, 2 from scarlet fever, 20 from whooping-cough, 6 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from measles are 26 more, from whooping-cough 9 more, and from enteric fever and from the diarrhoeas of childhood each 1 more, while those from diphtheria are of the same number, and those from scarlet fever are 2 fewer.

Deaths from influenza numbered 152, and those from respiratory diseases 371, the former being 110 and the latter 178 more than in the previous week.

Deaths of children less than one year old numbered 211, and of persons aged sixty-five and upwards 345, the former being 58 and the latter 103 more than in the previous week.

Deaths attributed to violent causes numbered 25, and are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·7, being 1°·5 below that for the previous week, and 0°·3 below that for the corresponding week of last year. The mean rainfall was 0·88 inch.

Note :—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.
* Cerebro-spinal meningitis.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 3. Week ending SATURDAY, JANUARY 21, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 21st January 1922 the births of 1238 living children, the deaths of 1952 persons, and 262 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1930. The equivalent annual birth-rate is 27·2, and the death-rate, corrected, 42·5 per thousand.

The birth-rate for the week is 1·4 below that for the previous week, 0·6 below the mean of the rates for the three preceding weeks, but 3·0 above that for the corresponding week of last year.

The death-rate for the week is 15·8 above that for the previous week, 22·3 above the mean of the rates for the three preceding weeks, and 25·9 above that for the corresponding week of last year. It is the highest Principal Town weekly death-rate since that of the week ending 2nd March 1895, which was 42·8. In the influenza epidemic of 1918-1919 the highest corresponding death-rate was 40·0, and occurred in the week ending 1st March 1919.

In the individual towns the death-rate ranged from 55·6 in Glasgow, 50·9 in Coatbridge, and 48·7 in Kirkcaldy, to 11·6 in Ayr, 17·3 in Motherwell and Wishaw, and 17·6 in Clydebank. In Dundee it was 41·1, in Edinburgh 35·1, in Falkirk 34·4, in Paisley 33·7, in Perth 33·2, in Hamilton 33·0, in Greenock 31·2, in Kilmarnock 29·0, in Dunfermline 25·4, and in Aberdeen 23·0. Compared with the returns for the previous week, the rate for Coatbridge shows an increase of 28·4, Kilmarnock of 24·6, Glasgow of 20·7, Hamilton of 19·8, Paisley of 17·7, Greenock of 16·5, and Edinburgh of 16·0. The only rate less than in the previous week is that for Perth, which was 33·2, or 17·4 less.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 150. They are 44 more than in the previous week, and are equal to an annual death-rate from these causes of 3·3 per thousand. These deaths include 2 from enteric fever, 88 from measles, 4 from scarlet fever, 34 from whooping-cough, 13 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 25 more, from whooping-cough 14 more, from diphtheria 7 more, from scarlet fever 2 more, and from enteric fever 1 more, while those from the diarrhoeas of childhood are 5 fewer.

Deaths from influenza numbered 379. They are 227 more than in the previous week.

Deaths from respiratory diseases numbered 681. They are 310 more than in the previous week.

Deaths of children of less than one year old numbered 344, and those of persons of sixty-five and upwards 497. The former are 133 more than in the previous week, and 203 more than in the corresponding week of last year. The latter are 152 more than in the previous week, and 271 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 32. They are 7 more than in the previous week, and 8 more than in the corresponding week of last year.

The mean temperature for seven of the towns named in the Table was 33°·4, being 4°·3 below that for the previous week, and 10°·2 below that for the corresponding week of last year. The mean rainfall was 1·22 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF

SCOTLAND.

By Authority of the Registrar-General.

No. 4. Week ending SATURDAY, JANUARY 28, 1922. Price 2d. net.

The Returns of the week ending 28th January 1922 provide evidence of the continuation of the present epidemic of Influenza.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, the births of 1391 living children, the deaths of 1989 persons, and 240 marriages were registered. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1952. The equivalent annual birth-rate is 30·6, and the death-rate, corrected, 42·9.

The birth-rate for the week is 3·4 more than that of the previous week, 2·7 more than the mean of those of the three preceding weeks, and 5·1 more than that of the corresponding week of last year.

The death-rate of the week is 0·4 more than that of the previous week, 13·6 more than the mean of those of the three preceding weeks, and 24·9 more than that of the corresponding week of last year.

A period of 47 years has elapsed since the Principal Town weekly death-rate was higher than that now found. In the week ending 9th January 1875 this rate was 54·9. In the influenza epidemic of 1918-1919 the highest corresponding death-rate was 40·0, and occurred in the week ending 1st March 1919.

In the individual towns the weekly death-rate ranged from 54·5 in Coatbridge, 48·4 in Greenock, 47·9 in Paisley, 46·0 in Edinburgh, and 45·7 in Glasgow, to 28·0 in Dunfermline, 28·4 in Perth, and 33·3 in Ayr. In Falkirk this rate was 39·1, in Hamilton 38·3, in Dundee 37·3, in Clydebank 36·3, in Aberdeen 34·8, in Kilmarnock 34·8, in Kirkcaldy 34·2, and in Motherwell and Wishaw 33·9.

Compared with the returns of the previous week, the death-rates of twelve of these towns show an increase, and four a decrease. The increase in the death-rate at Ayr amounts to 21·7, at Clydebank 18·7, at Greenock 17·2, and at Motherwell 16·6. The Glasgow death-rate shows a decrease of 9·9 and that of Dundee one of 3·8, but that of Edinburgh shows an increase of 10·9, and that of Aberdeen one of 11·8.

Deaths attributed to influenza numbered 476. They are 97 more than in the previous week.

Deaths from respiratory diseases numbered 656, and are 25 fewer than in the previous week.

Deaths of children less than one year old numbered 284, and those of persons of sixty-five and upwards 568. The former are 60 fewer than in the previous week, but 121 more than in the corresponding week of last year. The latter are 71 more than in the previous week, and 352 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 31. They are 1 fewer than in the previous week, but 4 more than in the corresponding week of last year.

The mean temperature for seven of the towns named in the Table was 36°·5, being 3°·1 above that for the previous week, but 5°·8 below that for the corresponding week of last year. The mean rainfall was 0·97 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 5. Week ending SATURDAY, FEBRUARY 4, 1922. Price 2d. net.

Although the death-rate is somewhat lower than that of the previous week evidence is provided of the continuation of the present epidemic of influenza.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, the births of 1369 living children, the deaths of 1776 persons, and 319 marriages were registered. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1760. The equivalent annual birth-rate is 30·1, and the death-rate, corrected, 38·7 per 1000.

The birth-rate for the week is 0·4 less than that of the previous week, but is 1·3 more than the mean of the three preceding weeks, and 3·9 more than that of the corresponding week of last year.

The death-rate of the week is 4·2 less than that of the preceding week, but is 1·3 more than the mean of the three preceding weeks, and 23·0 more than that of the corresponding week of last year.

In the individual towns the weekly death-rate ranged from 53·2 in Falkirk, 50·9 in Paisley, 43·6 in Motherwell and Wishaw, and 40·8 in Glasgow, to 13·2 in Kirkcaldy, 25·4 in Dunfermline, 26·4 in Clydebank and 27·1 in Dundee. In Aberdeen this rate was 40·4, in Edinburgh 40·3, in Greenock 40·2, in Ayr 39·1, in Hamilton 34·3, in Kilmarnock 33·4, in Coatbridge 32·0, and in Perth 28·4.

Compared with the returns of the previous week, the death-rates of Aberdeen, Paisley, Motherwell and Wishaw, Ayr and Falkirk show increases, while that of Perth was of the same amount, and those of the remaining ten burghs were all lower. The decrease in Kirkcaldy was 21·0, in Dundee 10·2, in Edinburgh 5·7, and in Glasgow 4·9. The weekly death-rate in Coatbridge is 22·5 less than that of the previous week, and Aberdeen shows an increase of 6·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 148. They are 13 more than in the previous week, and are equal to an annual death-rate from these causes of 3·3 per thousand. These deaths include 0 from enteric fever, 76 from measles, 5 from scarlet fever, 42 from whooping cough, 11 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from the diarrhoeas of childhood are 6 more, from measles and from whooping-cough each 4 more, while those from diphtheria number the same, and those from scarlet fever are 1 fewer.

Deaths attributed to influenza numbered 371. They are 105 fewer than in the previous week.

Deaths from respiratory diseases numbered 555, and are 101 fewer than in the previous week.

Deaths of children of less than one year old numbered 281, and those of persons of sixty-five and upwards 539. The former are 3 fewer than in the previous week, but 144 more than in the corresponding week of last year. The latter are 29 fewer than in the previous week, but 331 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 17. They are 14 fewer than in the previous week, and 6 fewer than in the corresponding week of last year.

The mean temperature for seven of the towns named in the Table was 39°·2, being 2°·7 above that for the previous week, and 0°·4 above that for the corresponding week of last year. The mean rainfall was 1·38 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 6. Week ending SATURDAY, FEBRUARY 11, 1922. Price 2d. net.

Although the death-rate is still above the average, the figures for the week show a decided abatement of the influenza epidemic.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 11th February 1922 the births of 1237 living children, the deaths of 1212 persons, and 286 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1195. The equivalent annual birth-rate is 27·2 per thousand, and the death-rate, corrected, 26·3.

The birth-rate for the week is 2·9 below that for the previous week, 2·1 below the mean of the rates for the three preceding weeks, but 0·3 above that for the corresponding week of last year.

The death-rate for the week is 12·4 below that for the previous week, 15·1 below the mean of the rates for the three preceding weeks, but 7·9 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 41·7 in Paisley, 40·3 in Coatbridge, and 33·5 in Aberdeen, to 17·8 in Dunfermline, 20·8 in Dundee, and 22·0 in Clydebank. In Greenock it was 29·3, in Kirkcaldy 28·9, in Hamilton 26·4, in Kilmarnock 26·1, in Glasgow 25·3, in Falkirk 25·0, in Edinburgh 24·8, in Ayr 24·6, in Motherwell and Wishaw 24·1, and in Perth 23·7.

Compared with the returns for the previous week, the death-rates of Coatbridge and Kirkcaldy were higher, but those of the remaining burghs were all lower. The increase in Kirkcaldy was 15·7, and in Coatbridge 8·3. The decrease in Falkirk was 28·2, in Motherwell 19·5, and in Glasgow and in Edinburgh 15·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 131. They are 17 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·9 per thousand. These deaths include 0 from enteric fever, 63 from measles, 6 from scarlet fever, 35 from whooping-cough, 10 from diphtheria, and 17 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 3 more, and from scarlet fever 1 more, but those from diphtheria are 1 fewer, from whooping-cough 7 fewer, and from measles 13 fewer.

Deaths from influenza numbered 173. They are 198 fewer than in the previous week.

Deaths from respiratory diseases numbered 338. They are 217 fewer than in the previous week.

Deaths of children of less than one year old numbered 241, and those of persons of sixty-five and upwards 356. The former are 40 fewer than in the previous week, but 63 more than in the corresponding week of last year. The latter are 183 fewer than in the previous week, but 115 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 23. They are 6 more than in the previous week, but 5 fewer than in the corresponding week of last year.

The mean temperature for seven of the towns named in the Table was 36°·8, being 2°·4 below that for the previous week, and 1°·4 below that for the corresponding week of last year. The mean rainfall was 0·31 inch.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 7. Week ending SATURDAY, FEBRUARY 18, 1922. Price 2d. net.

The weekly death-rate shows a further decline, and it and other figures given in the report indicate a further abatement of the influenza epidemic.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 18th February 1922 the births of 1226 living children, the deaths of 1038 persons, and 270 marriages. The weekly number of deaths, corrected by the exclusion of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 1022. The equivalent annual birth-rate is 27·0 per thousand, and the death-rate, corrected, 22·5 per thousand.

The birth-rate for the week is 0·2 less than that of the previous week, 2·3 less than the mean of those of the preceding three weeks, and 1·4 less than the corresponding week of last year.

The death-rate of the week is 3·8 less than that of the previous week, and 13·5 less than the mean of the rates of the three preceding weeks, but is 3·4 more than that of the corresponding week of last year.

In the individual towns the weekly death-rate varied from 35·0 in Paisley, 26·8 in Greenock, and 26·6 in Dundee, to 13·0 in Ayr, 13·2 in Clydebank, 13·2 in Hamilton, and 15·6 in Falkirk. In Kilmarnock this rate was 24·7, in Motherwell and Wishaw 24·1, in Kirkcaldy 23·7, in Glasgow 23·2, in Coatbridge, 22·5, in Edinburgh 21·1, in Dundee 18·4, in Dunfermline 17·8, and in Perth 17·4. In two of these towns the death-rate of the week was the same as in the previous week, while in all others it was lower.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 106. They are 25 fewer than in the previous week, and equal an annual death-rate of 2·3 per thousand. These deaths include 63 from measles, 3 from scarlet fever, 25 from whooping-cough, 3 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from whooping-cough are 10 fewer, from diphtheria 7 fewer, from the diarrhoeas of childhood 5 fewer, and from scarlet fever 3 fewer, while those from measles are of the same number.

Deaths from influenza numbered 95. They are 78 fewer than in the previous week.

Deaths from respiratory diseases (not tubercular) numbered 274. They are 64 fewer than in the previous week.

Deaths of children of less than one year old numbered 208, and those of persons of sixty-five and upwards 279. The former are 33 fewer than in the previous week, but 19 more than in the corresponding week of last year. The latter are 77 fewer than in the previous week, but 36 more than in the corresponding week of last year.

Deaths attributed to violent causes numbered 28. They are 5 more than in the previous week, and the same amount more than in the corresponding week of last year.

The mean temperature for seven of the towns named in the Table was 36°·3, being 0°·5 below that for the previous week, and 8°·1 below that for the corresponding week of last year. The mean rainfall was 0·90 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 8. Week ending SATURDAY, FEBRUARY 25, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 25th February 1922 the births of 1231 living children, the deaths of 895 persons, and 316 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 871. The equivalent annual birth-rate is 27·1 per thousand, and the death-rate, corrected, 19·2.

The birth-rate for the week is 0·1 above that for the previous week, but 1·0 below the mean of the rates for the three preceding weeks and 0·7 below that for the corresponding week of last year.

The death-rate for the week is 3·3 below that for the previous week, 10·0 below the mean of the rates for the three preceding weeks, and 1·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 27·3 in Coatbridge, 24·9 in Greenock, and 22·1 in Perth, to 8·7 in Ayr, 8·9 in Dunfermline, and 9·4 in Falkirk. In Glasgow it was 21·2, in Motherwell and Wishaw 20·3, in Edinburgh 17·9, in Paisley 17·8, in Aberdeen 17·7, in Dundee 17·1, in Kirkcaldy 17·1, in Clydebank 15·4, in Hamilton 13·2, and in Kilmarnock 11·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 79. They are 27 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·7 per thousand. These deaths include 48 from measles, 3 from scarlet fever, 17 from whooping-cough, 7 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the returns of the previous week, deaths from diphtheria are 4 more, those from scarlet fever number the same, while from whooping cough they are 8 fewer, from the diarrhoeas of childhood 8 fewer, and from measles 15 fewer.

Deaths from influenza numbered 51. They are 44 fewer than in the previous week.

Deaths from respiratory diseases numbered 179. They are 95 fewer than in the previous week.

Deaths of children of less than one year old numbered 172, and those of persons of sixty-five and upwards 249. The former are 36 fewer than in the previous week, and the latter 30 fewer.

Deaths attributed from violent causes numbered 36. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 41°·8, being 5°·5 above that for the previous week, and 0°·8 above that for the corresponding week of last year. The mean rainfall was 1·10 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 9. Week ending SATURDAY, MARCH 4, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 4th March 1922 the births of 1260 living children, the deaths of 904 persons, and 471 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 886. The equivalent annual birth-rate is 27·7 per thousand, and the death-rate, corrected, 19·5.

The birth-rate for the week is 0·6 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year.

The death-rate for the week is 0·3 above that for the previous week, and 0·5 above that for the corresponding week of last year, but is 3·2 below the mean of the rates for the three preceding weeks.

In the individual towns the death-rate ranged from 23·7 in Perth, 22·5 in Coatbridge, and 22·3 in Aberdeen, to 11·5 in Dunfermline, 13·2 in Clydebank, and 15·6 in Falkirk. In Kilmarnock it was 21·8, in Glasgow 20·5, in Greenock 19·8, in Hamilton 19·8, in Kirkcaldy 19·7, in Paisley 19·6, in Dundee 19·0, in Ayr 18·8, in Edinburgh 17·4, and in Motherwell and Wishaw 17·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 101. They are 22 more than in the previous week, and are equal to an annual death-rate from these causes of 2·2 per thousand. These deaths include 54 from measles, 4 from scarlet fever, 24 from whooping-cough, 7 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 8 more, from whooping cough 7 more, from measles 6 more, and from scarlet fever 1 more.

Deaths from influenza numbered 43. They are 8 fewer than in the previous week.

Deaths from respiratory diseases numbered 183. They are 4 more than in the previous week.

Deaths of children of less than one year old numbered 174, and those of persons of sixty-five and upwards 266. The former are 2^e more than in the previous week. The latter are 17 more than in the previous week.

Deaths attributed to violent causes numbered 24. They are 12 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·3, being 1°·5 above that for the previous week, and 1°·4 above that for the corresponding week of last year. The mean rainfall was 0·78 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 10. Week ending SATURDAY, MARCH 11, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 11th March 1922 the births of 1236 living children, the deaths of 779 persons, and 302 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 760. The equivalent annual birth-rate is 27·2 per thousand, and the death-rate, corrected, 16·7.

The birth-rate for the week is 0·5 below that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, but 0·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 22·1 in Perth, 20·2 in Paisley, and 20·1 in Coatbridge, to 7·6 in Dunfermline, 11·9 in Hamilton, and 12·8 in Motherwell and Wishaw. In Falkirk it was 18·8, in Glasgow 17·3, in Edinburgh 16·9, in Aberdeen 16·8, in Greenock 16·6, in Dundee 16·2, in Kirkcaldy 15·8, in Clydebank 13·2, in Kilmarnock 13·1, and in Ayr 13·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 96. They are 5 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·1 per thousand. These deaths include 48 from measles, 4 from scarlet fever, 26 from whooping-cough, 5 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping cough are 2 more, and from the diarrhoeas of childhood 1 more, while those from scarlet fever number the same, but those from diphtheria are 2 fewer, and from measles 6 fewer.

Deaths from influenza numbered 19. They are 24 fewer than in the previous week.

Deaths from respiratory diseases numbered 154. They are 29 fewer than in the previous week.

Deaths of children of less than one year old numbered 159, and those of persons of sixty-five and upwards 242. The former are 15 fewer than in the previous week. The latter are 24 fewer than in the previous week.

Deaths attributed to violent causes numbered 31. They are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 41°·9, being 1°·4 below that for the previous week, but 1°·9 above that for the corresponding week of last year. The mean rainfall was 0·66 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 11. Week ending SATURDAY, MARCH 18, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 18th March 1922 the births of 1176 living children, the deaths of 762 persons, and 238 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 739. The equivalent annual birth-rate is 25·9 per thousand, and the death-rate, corrected, 16·3.

The birth-rate for the week is 1·3 below that for the previous week, 1·4 below the mean of the rates for the three preceding weeks, and 1·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·8 in Glasgow, 18·4 in Aberdeen, and 16·6 in Coatbridge, to 7·2 in Ayr, 8·8 in Clydebank, and 8·9 in Dunfermline. In Paisley it was 16·0, in Greenock 15·3, in Motherwell and Wishaw 15·0, in Edinburgh 14·9, in Kirkcaldy 14·5, in Dundee 13·1, in Perth 12·6, in Kilmarnock 11·6, in Falkirk 11·0, and in Hamilton, 10·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 110. They are 14 more than in the previous week, and are equal to an annual death-rate from these causes of 2·4 per thousand. These deaths include 2 from enteric fever, 79 from measles, 3 from scarlet fever, 9 from whooping-cough, 3 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 31 more, from enteric fever 2 more, and from the diarrhoeas of childhood 1 more, but those from scarlet fever are 1 fewer, from diphtheria 2 fewer, and from whooping cough 17 fewer.

Deaths from influenza numbered 10. They are 9 fewer than in the previous week.

Deaths from respiratory diseases numbered 131. They are 23 fewer than in the previous week.

Deaths of children of less than one year old numbered 150, and those of persons of sixty-five and upwards 186. The former are 9 fewer than in the previous week, and the latter are 56 fewer than in that week.

Deaths attributed to violent causes numbered 17. They are 14 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·0, being 1°·1 above that for the previous week, but 0°·6 below that for the corresponding week of last year. The mean rainfall was 0·01 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 12. **Week ending SATURDAY, MARCH 25, 1922.** **Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 25th March 1922 the births of 1226 living children, the deaths of 797 persons, and 297 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 765. The equivalent annual birth-rate is 27·0 per thousand, and the death-rate, corrected, 16·8.

The birth-rate for the week is 1·3 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, and 2·0 above that for the corresponding week of last year. The death-rate for the week is 0·5 above that for the previous week, and 0·7 above that for the corresponding week of last year, but is 0·7 below the mean of those of the three preceding weeks.

In the individual towns the death-rate ranged from 20·1 in Coatbridge, 19·1 in Greenock, and 18·8 in Falkirk, to 7·7 in Clydebank, 10·6 in Hamilton, and 11·6 in Ayr. In Glasgow it was 18·2, in Motherwell and Wishaw 18·1, in Paisley 17·8, in Dunfermline 17·8, in Edinburgh 16·2, in Kilmarnock 16·0, in Dundee 15·9, in Perth 15·8, in Aberdeen 13·5, and in Kirkcaldy 13·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 101. They are 9 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·2 per thousand. These deaths include 76 from measles, 1 from scarlet fever, 11 from whooping-cough, 7 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, and from whooping cough 2 more, but those from scarlet fever are 2 fewer, from measles 3 fewer, and from the diarrhoeas of childhood 8 fewer.

Deaths from influenza numbered 10. They are the same as in the previous week.

Deaths from respiratory diseases numbered 156. They are 25 more than in the previous week.

Deaths of children of less than one year old numbered 137, and those of persons of sixty-five and upwards 220. The former are 13 fewer than in the previous week, but the latter are 34 more than in that week.

Deaths attributed to violent causes numbered 19, and are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·6, being 5°·4 below that for the previous week, and 8°·1 below that for the corresponding week of last year. The mean rainfall was 0·39 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 13. Week ending SATURDAY, APRIL 1, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 1st April 1922 the births of 1297 living children, the deaths of 815 persons, and 301 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 794. The equivalent annual birth-rate is 28·5 per thousand, and the death-rate, corrected, 17·5.

The birth-rate for the week is 1·5 above that for the previous week, 1·9 above the mean of the rates for the three preceding weeks, but 0·9 below that for the corresponding week of last year. The death-rate is 0·7 above that of the previous week, 0·9 above the mean of the rates of the three preceding weeks, and 1·2 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 26·1 in Coatbridge, 19·0 in Paisley, and 19·0 in Perth, to 8·9 in Dunfermline, 11·6 in Kilmarnock, and 13·2 in Kirkcaldy. In Glasgow it was 18·6, in Hamilton 18·5, in Falkirk 17·2, in Dundee 16·8, in Aberdeen 16·8, in Edinburgh 16·7, in Greenock 16·6, in Ayr 14·5, in Motherwell and Wishaw 14·3, and in Clydebank 14·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 117. They are 16 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·6 per thousand. These deaths include 88 from measles, 2 from scarlet fever, 16 from whooping-cough, 4 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 12 more, from whooping-cough 5 more, from scarlet fever 1 more, and from the diarrhoeas of childhood 1 more, but those from diphtheria are 3 fewer.

Deaths from influenza numbered 8. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 164. They are 8 more than in the previous week.

Deaths of children of less than one year old numbered 186, and those of persons of sixty-five and upwards 198. The former are 49 more than in the previous week, but the latter are 22 fewer than in that week.

Deaths attributed to violent causes numbered 18. They are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·6, being the same as that for the previous week, but 7°·8 below that for the corresponding week of last year. The mean rainfall was 0·34 inch.

* Cerebro-spinal meningitis.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF SCOTLAND.

By Authority of the Registrar-General.

No. 14. Week ending SATURDAY, APRIL 8, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 8th April 1922 the births of 1219 living children, the deaths of 897 persons, and 426 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 877. The equivalent annual birth-rate is 26·8 per thousand, and the death-rate, corrected, 19·3.

The birth-rate for the week is 1·7 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year. The death-rate for the week is 1·8 above that for the previous week, 2·4 above the mean of the rates for the three preceding weeks, and 3·4 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 35·5 in Coatbridge, 28·8 in Paisley, and 26·9 in Perth, to 12·1 in Clydebank, 13·1 in Kilmarnock, and 13·2 in Hamilton. In Dundee it was 24·9, in Aberdeen 22·0, in Greenock 21·7, in Glasgow 19·2, in Dunfermline 19·1, in Motherwell and Wishaw 18·1, in Falkirk 15·6, in Edinburgh 14·9, in Kirkcaldy 14·5, and in Ayr 14·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 163. They are 46 more than in the previous week, and are equal to an annual death-rate from these causes of 3·6 per thousand. These deaths include 128 from measles, 1 from scarlet fever, 21 from whooping-cough, 6 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 40 more, from whooping-cough 5 more, and from diphtheria 2 more, while those from the diarrhoeas of childhood number the same, and those from scarlet fever are 1 fewer.

Deaths from influenza numbered 8. They are the same as in the previous week.

Deaths from respiratory diseases numbered 154. They are 10 fewer than in the previous week.

Deaths of children of less than one year old numbered 192, and those of persons of sixty-five and upwards 223. The former are 6 more than in the previous week, and the latter are 25 more than in that week.

Deaths attributed to violent causes numbered 25. They are 7 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·4, being 0°·8 more than in the previous week, but 8°·2 below that for the corresponding week of last year. The mean rainfall was 0·19 inch.

* Cerebro-spinal meningitis.

FOR OFFICIAL USE.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 15. Week ending SATURDAY, APRIL 15, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 15th April 1922 the births of 1073 living children, the deaths of 931 persons, and 345 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 906. The equivalent annual birth-rate is 23·6 per thousand, and the death-rate, corrected, 19·9.

The birth-rate for the week is 3·2 below that for the previous week, 3·8 below the mean of the rates for the three preceding weeks, and 4·9 below that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, 2·0 above the mean of the rates for the three preceding weeks, and 4·6 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 33·2 in Coatbridge, 24·5 in Paisley, 23·6 in Dundee, and 23·3 in Motherwell and Wishaw, to 7·2 in Ayr, 12·5 in Falkirk, and 14·5 in Kirkcaldy and in Hamilton. In Clydebank it was 23·1, in Greenock 21·0, in Glasgow 20·9, in Perth 20·5, in Aberdeen 19·1, in Kilmarnock 18·9, in Dunfermline 16·5, and in Edinburgh 16·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 176. They are 13 more than in the previous week, and are equal to an annual death-rate from these causes of 3·9 per thousand. These deaths include 130 from measles, 1 from scarlet fever, 27 from whooping-cough, 8 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 6 more, from the diarrhoeas of childhood 3 more, and from measles and diphtheria each 2 more, while those from scarlet fever number the same.

Deaths from influenza numbered 8. They are the same as in the previous week.

Deaths from respiratory diseases numbered 158. They are 4 more than in the previous week.

Deaths of children of less than one year old numbered 176, and those of persons of sixty-five and upwards 221. The former are 16 fewer than in the previous week, and the latter are 2 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·5, being 2°·1 above that for the previous week, but 2°·6 below that for the corresponding week of last year. The mean rainfall was 1·46 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 16. **Week ending SATURDAY, APRIL 22, 1922.** **Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 22nd April 1922 the births of 1419 living children, the deaths of 861 persons, and 534 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 854. The equivalent annual birth-rate is 31·2 per thousand, and the death-rate, corrected, 18·8.

The birth-rate for the week is 7·6 above that for the previous week, and 4·9 above the mean of the rates for the three preceding weeks, but is 0·2 below that for the corresponding week of last year. The death-rate for the week is 1·1 below that for the previous week, and 0·1 below the mean of the rates for the three preceding weeks, but is 2·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 52·1 in Coatbridge, 28·2 in Paisley, and 24·8 in Motherwell and Wishaw, to 11·6 in Ayr, 12·5 in Falkirk, and 14·5 in Hamilton. In Aberdeen it was 21·4, in Kilmarnock 18·9, in Glasgow 18·7, in Dunfermline 17·8, in Kirkealdy 17·1, in Edinburgh 16·4, in Perth 15·8, in Clydebank 15·4, in Dundee 14·9, and in Greenock 14·7. The high death-rates in Paisley and Coatbridge are associated with epidemics of measles.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 151. They are 25 fewer than in the previous week, and are equal to an annual death-rate from these causes of 3·3 per thousand. These deaths include 121 from measles, 1 from scarlet fever, 16 from whooping-cough, 3 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 5 fewer, from measles 9 fewer, and from whooping-cough 11 fewer.

Deaths from influenza numbered 6. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 168. They are 10 more than in the previous week.

Deaths of children of less than one year old numbered 173, and those of persons of sixty-five and upwards 210. The former are 3 fewer than in the previous week, and the latter are 11 fewer than in that week.

Deaths attributed to violent causes numbered 15. They are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·1, being 1°·6 above that for the previous week, but 1°·2 below that for the corresponding week of last year. The mean rainfall was 0·05 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 17. Week ending SATURDAY, APRIL 29, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 29th April 1922 the births of 1316 living children, the deaths of 827 persons, and 506 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 817. The equivalent annual birth-rate is 28·9 per thousand, and the death-rate, corrected, 18·0.

The birth-rate for the week is 2·3 below that for the previous week, 1·7 above the mean of the rates for the three preceding weeks, and 1·9 below that for the corresponding week of last year. The death-rate for the week is 0·8 below that for the previous week, and 1·3 below the mean of the rates for the three preceding weeks, but 2·2 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 42·7 in Coatbridge, 27·8 in Motherwell and Wishaw, and 23·5 in Falkirk, to 8·9 in Dunfermline, 9·2 in Hamilton, and 9·5 in Perth. In Kilmarnock it was 21·8, in Dundee 20·8, in Clydebank 19·8, in Aberdeen 18·7, in Glasgow 17·9, in Ayr 17·4, in Greenock 16·6, in Edinburgh 15·3, in Paisley 14·7, and in Kirkcaldy 14·5. The high death-rates in Coatbridge, in Motherwell and Wishaw, and in Clydebank are associated with epidemics of measles. Deaths in these three towns numbered 91, and of them 47 were due to measles.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 158. They are 7 more than in the previous week, and are equal to an annual death-rate from these causes of 3·5 per thousand. These deaths include 1 from enteric fever, 118 from measles, 4 from scarlet fever, 18 from whooping-cough, 10 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 7 more, from scarlet fever 3 more, from whooping-cough 2 more, and from enteric fever 1 more, but those from measles are 3 fewer, and from the diarrhoeas of childhood 3 fewer.

Deaths from influenza numbered 4. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 158. They are 10 fewer than in the previous week.

Deaths of children of less than one year old numbered 167, and those of persons of sixty-five and upwards 207. The former are 6 fewer than in the previous week, and the latter are 3 fewer than in that week.

Deaths attributed to violent causes numbered 25. They are 10 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 43°·5, being 1°·4 above that for the previous week, but 5°·7 below that for the corresponding week of last year. The mean rainfall was 0·42 inch.

BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 18. Week ending SATURDAY, MAY 6, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 6th May 1922 the births of 1257 living children, the deaths of 777 persons, and 477 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 782. The equivalent annual birth-rate is 27·6 per thousand, and the death-rate, corrected, 17·2.

The birth-rate for the week is 1·3 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 4·1 below that for the corresponding week of last year. The death-rate for the week is 0·8 below that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, but 1·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 30·6 in Greenock, 27·8 in Motherwell and Wishaw, and 27·3 in Coatbridge, to 7·7 in Clydebank, 10·1 in Ayr, and 12·2 in Edinburgh. In Hamilton it was 21·1, in Dundee 19·9, in Glasgow 18·1, in Kirkcaldy 17·1, in Paisley 16·6, in Aberdeen 14·8, in Kilmarnock 14·5, in Dunfermline 12·7, in Perth 12·6, and in Falkirk 12·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 147. They are 11 fewer than in the previous week, and are equal to an annual death-rate from these causes of 3·2 per thousand. These deaths include 2 from enteric fever, 105 from measles, 3 from scarlet fever, 19 from whooping-cough, 6 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 5 more, from enteric fever 1 more, and from whooping-cough 1 more, but those from scarlet fever are 1 fewer, from diphtheria 4 fewer, and from measles 13 fewer.

Deaths from influenza numbered 7. They are 3 more than in the previous week.

Deaths from respiratory diseases numbered 129. They are 29 fewer than in the previous week.

Deaths of children of less than one year old numbered 143, and those of persons of sixty-five and upwards 194. The former are 24 fewer than in the previous week, and the latter are 13 fewer than in that week.

Deaths attributed to violent causes numbered 23. They are 2 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 46·1, being 2·6 above that for the previous week, and 0·3 above that for the corresponding week of last year. The mean rainfall was 0·84 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 19. Week ending SATURDAY, MAY 13, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 13th May 1922 the births of 1185 living children, the deaths of 742 persons, and 155 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 740. The equivalent annual birth-rate is 26·1 per thousand, and the death-rate, corrected, 16·3.

The birth-rate for the week is 1·5 below that for the previous week, 3·1 below the mean of the rates for the three preceding weeks, and 5·1 below that for the corresponding week of last year. The death-rate for the week is 0·9 below that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, but 1·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 30·0 in Greenock, 20·5 in Dundee, 20·5 in Perth, and 20·1 in Coatbridge, to 6·6 in Clydebank, 9·2 in Hamilton, and 9·4 in Falkirk. In Motherwell and Wishaw it was 18·1, in Kilmarnock 17·4, in Glasgow 17·1, in Dunfermline 16·5, in Ayr 15·9, in Paisley 15·3, in Aberdeen 14·5, in Kirkcaldy 14·5, and in Edinburgh 12·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 116. They are 31 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·6 per thousand. These deaths include 83 from measles, 3 from scarlet fever, 18 from whooping-cough, 1 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 1 fewer, from whooping-cough 1 fewer, from diphtheria 5 fewer, and from measles 22 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 7. They are the same as in the previous week.

Deaths from respiratory diseases numbered 116. They are 13 fewer than in the previous week.

Deaths of children of less than one year old numbered 126, and those of persons of sixty-five and upwards 209. The former are 17 fewer than in the previous week, but the latter are 15 more than in that week.

Deaths attributed to violent causes numbered 17. They are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 48°·3, being 2°·2 above that for the previous week, but 4°·8 below that for the corresponding week of last year. The mean rainfall was 0·07 inch.

Note:—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.
* Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 20. **Week ending SATURDAY, MAY 20, 1922.** **Price 2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 20th May 1922 the births of 1232 living children, the deaths of 723 persons, and 154 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 694. The equivalent annual birth-rate is 27·1 per thousand, and the death-rate, corrected, 15·3.

The birth-rate for the week is 1·0 above that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 3·3 below that for the corresponding week of last year. The death-rate for the week is 1·0 below that for the previous week, 1·9 below the mean of the rates for the three preceding weeks, but 1·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 34·4 in Greenock, 28·4 in Coatbridge, and 20·5 in Perth, to 8·9 in Dunfermline, 11·0 in Falkirk, and 11·8 in Aberdeen. In Hamilton it was 19·8, in Kirkcaldy 19·7, in Motherwell and Wishaw 17·3, in Dundee 17·1, in Glasgow 14·4, in Paisley 14·1, in Clydebank, 13·2, in Kilmarnock 13·1, in Edinburgh 13·0, and in Ayr 13·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 127. They are 11 more than in the previous week, and are equal to an annual death-rate from these causes of 2·8 per thousand. These deaths include 1 from enteric fever, 89 from measles, 3 from scarlet fever, 17 from whooping-cough, 4 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 6 more, from diphtheria 3 more, from the diarrhoeas of childhood 2 more, and from enteric fever 1 more, while those from whooping-cough are 1 fewer.

Deaths from influenza numbered 4. They are 3 fewer than in the previous week.

Deaths from respiratory diseases numbered 100. They are 16 fewer than in the previous week.

Deaths of children of less than one year old numbered 137, and those of persons of sixty-five and upwards 180. The former are 11 more than in the previous week, and the latter are 29 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·3, being 3°·0 above that for the previous week, and 0°·1 above that for the corresponding week of last year. The mean rainfall was 1·43 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 21. Week ending SATURDAY, MAY 27, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 27th May 1922 the births of 1116 living children, the deaths of 659 persons, and 143 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 646. The equivalent annual birth-rate is 24·5 per thousand, and the death-rate, corrected, 14·2.

The birth-rate for the week is 2·6 below that for the previous week, 2·4 below the mean of the rates for the three preceding weeks, and 3·7 below that for the corresponding week of last year. The death-rate for the week is 1·1 below that for the previous week, 2·1 below the mean of the rates for the three preceding weeks, but 1·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 42·1 in Greenock, 23·5 in Falkirk, and 16·6 in Coatbridge, to 7·7 in Clydebank, 9·2 in Aberdeen, and 11·0 in Paisley. In Kilmarnock it was 16·0, in Hamilton 15·8, in Glasgow 14·0, in Dunfermline 14·0, in Motherwell and Wishaw 13·5, in Ayr 13·0, in Dundee 12·8, in Perth 12·6, in Edinburgh 12·5, and in Kirkcaldy 11·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 110. They are 17 fewer than in the previous week, and are equal to an annual death-rate from these causes of 2·4 per thousand. These deaths include 79 from measles, 1 from scarlet fever, 20 from whooping-cough, 4 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 3 more, those from diphtheria number the same, but those from scarlet fever are 2 fewer, from the diarrhoeas of childhood 7 fewer, and from measles 10 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 5. They are 1 more than in the previous week.

Deaths from respiratory diseases numbered 100. They are the same as in the previous week.

Deaths of children of less than one year old numbered 125, and those of persons of sixty-five and upwards 173. The former are 12 fewer than in the previous week, and the latter are 7 fewer than in that week.

Deaths attributed to violent causes numbered 17. They are 5 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·6, being 3°·3 above that for the previous week, and 1°·4 above that for the corresponding week of last year. The mean rainfall was 0·30 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 22.	Week ending SATURDAY, JUNE 3, 1922.	Price 2d. net.
----------------	--	-----------------------

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 3rd June 1922 the births of 1197 living children, the deaths of 658 persons, and 293 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 637. The equivalent annual birth-rate is 26·3 per thousand, and the death-rate, corrected, 14·0.

The birth-rate for the week is 1·8 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, but 4·6 below that for the corresponding week of last year. The death-rate for the week is 0·2 below that for the previous week, 1·3 below the mean of the rates for the three preceding weeks, but 1·5 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 36·3 in Greenock, 20·5 in Perth, and 18·8 in Falkirk, to 5·8 in Ayr, 6·4 in Dunfermline, and 9·8 in Paisley. In Kirkcaldy it was 18·4, in Aberdeen 15·4, in Edinburgh 13·8, in Motherwell and Wishaw 13·5, in Dundee 13·4, in Glasgow 13·1, in Coatbridge 13·0, in Clydebank 11·0, in Hamilton 10·6, and in Kilmarnock 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 82. They are 28 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·8 per thousand. These deaths include 1 from enteric fever, 48 from measles, 3 from scarlet fever, 14 from whooping-cough, 3 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 7 more, from scarlet fever 2 more, and enteric fever 1 more, while those from diphtheria are 1 fewer, from whooping-cough 6 fewer, and those from measles are 31 fewer.

Deaths from influenza numbered 2. They are 3 fewer than in the previous week.

Deaths from respiratory diseases numbered 83. They are 17 fewer than in the previous week.

Deaths of children of less than one year old numbered 109, and those of persons of sixty-five and upwards 159. The former are 16 fewer than in the previous week, and the latter are 14 fewer than in that week.

Deaths attributed to violent causes numbered 29. They are 12 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·9, being 2°·3 above that for the previous week, and 3°·5 above that for the corresponding week of last year. The mean rainfall was 0·05 inch.

 * Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 23. Week ending SATURDAY, JUNE 10, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 10th June 1922 the births of 1193 living children, the deaths of 632 persons, and 716 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 614. The equivalent annual birth-rate is 26·2 per thousand, and the death-rate, corrected, 13·5.

The birth-rate for the week is 0·1 below that for the previous week, 0·2 above the mean of the rates for the three preceding weeks, but 3·0 below that for the corresponding week of last year. The death-rate for the week is 0·5 below that for the previous week, 1·0 below the mean of the rates for the three preceding weeks, but 0·8 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 30·0 in Greenock, 19·0 in Perth, and 18·1 in Motherwell and Wishaw, to 6·4 in Dunfermline, 6·6 in Clydebank, and 8·7 in Ayr. In Paisley it was 16·0, in Hamilton 15·8, in Edinburgh 15·0, in Kirkcaldy 13·2, in Dundee 13·1, in Glasgow and in Falkirk, 12·5, in Kilmarnock 11·6, in Aberdeen 9·9, and in Coatbridge 9·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 63. They are 19 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·4 per thousand. These deaths include none from enteric fever, 35 from measles, 1 from scarlet fever, 13 from whooping-cough, 2 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever, whooping-cough, diphtheria and the diarrhoeas of childhood are each 1 fewer, from scarlet fever 2 fewer, and from measles 13 fewer.

No deaths from influenza were registered during the week.

Deaths from respiratory diseases numbered 82. They are 1 fewer than in the previous week.

Deaths of children of less than one year old numbered 101, and those of persons of sixty-five and upwards 166. The former are 8 fewer than in the previous week, but the latter are 7 more than in that week.

Deaths attributed to violent causes numbered 17. They are 12 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·9, being the same as that for the previous week, but 2°·3 above that for the corresponding week of last year. The mean rainfall was 0·17 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 24. Week ending SATURDAY, JUNE 17, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 17th June 1922 the births of 1184 living children, the deaths of 615 persons, and 453 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 592. The equivalent annual birth-rate is 26·0 per thousand, and the death-rate, corrected, 13·0.

The birth-rate for the week is 0·2 below that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, but 5·0 below that for the corresponding week of last year. The death-rate for the week is 0·5 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, but 0·3 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Kilmarnock, 17·1 in Kirkcaldy, and 15·9 in Greenock, to 9·2 in Hamilton, 9·8 in Paisley, and 9·9 in Aberdeen. In Edinburgh it was 15·6, in Dunfermline 15·3, in Motherwell and Wishaw 14·3, in Falkirk 14·1, in Dundee 14·0, in Clydebank 13·2, in Coatbridge and Ayr 13·0, in Perth 12·6, and in Glasgow 12·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55. They are 8 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 33 from measles, none from scarlet fever, 9 from whooping-cough, 4 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 2 more, from enteric fever 1 more, while those from scarlet fever are 1 fewer, from measles 2 fewer, and from whooping-cough and the diarrhoeas of childhood each 4 fewer.

Deaths from influenza numbered 2. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 80. They are 2 fewer than in the previous week.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 173. The former are 25 fewer than in the previous week, but the latter are 7 more than in that week.

Deaths attributed to violent causes numbered 26. They are 9 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·0, being 3°·9 below that for the previous week, and 4°·5 below that for the corresponding week of last year. The mean rainfall was 0·50 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 25. Week ending SATURDAY, JUNE 24, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have a population of 2,370,600, there were registered during the week ending 24th June 1922 the births of 1196 living children, the deaths of 549 persons, and 440 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 513. The equivalent annual birth-rate is 26·3 per thousand, and the death-rate, corrected, 11·3.

The birth-rate for the week is 0·3 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, but 1·7 below that for the corresponding week of last year. The death-rate for the week is 1·7 below that for the previous week, 2·2 below the mean of the rates for the three preceding weeks, and 1·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Kilmarnock, 17·2 in Greenock, and 14·2 in Coatbridge, to 4·7 in Falkirk, 6·3 in Perth, and 7·6 in Dunfermline. In Hamilton it was 13·2, in Ayr 13·0, in Dundee 12·8, in Edinburgh 12·4, in Aberdeen 11·5, in Glasgow 10·7, in Clydebank 9·9, in Motherwell and Wishaw 9·8, in Paisley 8·6, and in Kirkcaldy 7·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 37. They are 18 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 16 from measles, 1 from scarlet fever, 10 from whooping-cough, 1 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever, whooping-cough and the diarrhoeas of childhood are each 1 more, while those from diphtheria are 3 fewer, and from measles 17 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 4. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 58. They are 22 fewer than in the previous week.

Deaths of children of less than one year old numbered 76, and those of persons of sixty-five and upwards 152. The former are the same as in the previous week, but the latter are 21 fewer than in that week.

Deaths attributed to violent causes numbered 18. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·0, being 1°·0 above that for the previous week, but 3°·5 below that for the corresponding week of last year. The mean rainfall was 0·79 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 26.	Week ending SATURDAY, JULY 1, 1922.	Price 2d. net.
----------------	--	-----------------------

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 1st July 1922 the births of 1152 living children, the deaths of 591 persons, and 530 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 579. The equivalent annual birth-rate is 25·3 per thousand, and the death-rate, corrected, 12·7.

The birth-rate for the week is 1·0 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, and 2·0 below that for the corresponding week of last year. The death-rate for the week is 1·4 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, and 0·9 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·8 in Falkirk, 17·8 in Greenock, and 17·1 in Kirkcaldy, to 5·8 in Kilmarnock, 9·8 in Paisley, and 10·1 in Ayr. In Aberdeen it was 15·4, in Hamilton 14·5, in Dunfermline 14·0, in Glasgow 13·2, in Perth 12·6, in Motherwell and Wishaw 12·0, in Coatbridge 11·8, in Edinburgh 11·2, in Clydebank 11·0, and in Dundee 10·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 50. They are 13 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 19 from measles, 2 from scarlet fever, 10 from whooping-cough, 5 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 5 more, from diphtheria 4 more, from measles 3 more, and from scarlet fever 1 more, but those from whooping-cough number the same.

No deaths from influenza were registered during the week. In the previous week there were 4.

Deaths from respiratory diseases numbered 53. They are 5 fewer than in the previous week.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 157. The former are 32 more than in the previous week, and the latter are 5 more than in that week.

Deaths attributed to violent causes numbered 20. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·0, being 1°·0 below that for the previous week, and 4°·2 below that for the corresponding week of last year. The mean rainfall was 0·78 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 27. Week ending SATURDAY, JULY 8, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 8th July 1922 the births of 1174 living children, the deaths of 565 persons, and 567 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 561. The equivalent annual birth-rate is 25·8 per thousand, and the death-rate, corrected, 12·3.

The birth-rate for the week is 0·5 above that for the previous week, 0·1 below the mean of the rates for the three preceding weeks, and 1·0 below that for the corresponding week of last year. The death-rate for the week is 0·4 below that for the previous week, but is the same as the mean of the rates for the three preceding weeks, and 0·7 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·4 in Greenock, 20·3 in Kilmarnock, and 13·7 in Dundee, to 6·4 in Dunfermline, 7·7 in Clydebank, and 8·7 in Ayr. In Coatbridge it was 13·0, in Edinburgh 12·8, in Paisley 12·3, in Glasgow 12·2, in Hamilton 11·9, in Perth 11·1, in Aberdeen 10·8, in Kirkcaldy 10·5, in Motherwell and Wishaw 9·8, and in Falkirk, 9·4.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 48. They are 2 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 20 from measles, 1 from scarlet fever, 12 from whooping-cough, 1 from diphtheria, and 14 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 2 more, and from measles 1 more, while from the diarrhoeas of childhood they number the same, from scarlet fever 1 fewer, and from diphtheria 4 fewer.

No deaths from influenza were registered during the week.

Deaths from respiratory diseases numbered 74. They are 21 more than in the previous week.

Deaths of children of less than one year old numbered 71, and those of persons of sixty-five and upwards 175. The former are 37 fewer than in the previous week, but the latter are 18 more than in that week.

Deaths attributed to violent causes numbered 24. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 53°·5, being 0°·5 above that for the previous week, but 9°·4 below that for the corresponding week of last year. The mean rainfall was 1·52 inch.

BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 28. Week ending SATURDAY, JULY 15, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 15th July 1922 the births of 1178 living children, the deaths of 492 persons, and 521 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 464. The equivalent annual birth-rate is 25·9 per thousand, and the death-rate, corrected, 10·2.

The birth-rate for the week is 0·1 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, but 1·1 below that for the corresponding week of last year. The death-rate for the week is 2·1 below that for the previous week, 1·9 below the mean of the rates for the three preceding weeks, and 0·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·2 in Falkirk, 16·6 in Greenock, and 14·5 in Hamilton and in Ayr, to 6·6 in Clydebank and in Kirkcaldy, and 6·7 in Paisley. In Perth it was 14·2, in Aberdeen 11·8, in Kilmarnock 11·6, in Dundee 10·9, in Edinburgh and in Motherwell and Wishaw 10·5, in Glasgow 9·2, in Dunfermline 8·9, and in Coatbridge 7·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 29. They are 19 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 1 from enteric fever, 10 from measles, 2 from scarlet fever, 5 from whooping-cough, 4 from diphtheria, and 7 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 3 more, from enteric fever and scarlet fever each 1 more, while those from whooping-cough and the diarrhoeas of childhood are each 7 fewer and from measles 10 fewer.

Deaths from influenza numbered 2. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 42. They are 32 fewer than in the previous week.

Deaths of children of less than one year old numbered 59, and those of persons of sixty-five and upwards 130. The former are 12 fewer than in the previous week, and the latter are 45 fewer than in that week.

Deaths attributed to violent causes numbered 28. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·9, being 1°·4 above that for the previous week, but 7°·1 below that for the corresponding week of last year. The mean rainfall was 0·53 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 29. Week ending SATURDAY, JULY 22, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 22nd July 1922 the births of 1187 living children, the deaths of 558 persons, and 804 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 549. The equivalent annual birth-rate is 28·7 per thousand, and the death-rate, corrected, 12·1.

The birth-rate for the week is 2·8 above that for the previous week, 3·0 above the mean of the rates for the three preceding weeks, and 2·2 above that for the corresponding week of last year. The death-rate for the week is 1·9 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, but 0·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·4 in Kirkcaldy, 18·0 in Dundee, and 15·3 in Greenock, to 3·8 in Dunfermline, 7·8 in Falkirk, and 7·9 in Perth. In Hamilton it was 14·5, in Kilmarnock 14·5, in Edinburgh 12·2, in Clydebank 12·1, in Coatbridge 11·8, in Ayr 11·6, in Aberdeen 11·5, in Glasgow 11·3, in Motherwell and Wishaw 11·3, and in Paisley 11·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 48. They are 19 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 17 from measles, 1 from scarlet fever, 13 from whooping-cough, 2 from diphtheria, and 15 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 8 more, from the diarrhoeas of childhood 8 more, and from measles 7 more, but those from scarlet fever are 1 fewer, and from diphtheria 2 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 1. They are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 66. They are 24 more than in the previous week.

Deaths of children of less than one year old numbered 88, and those of persons of sixty-five and upwards 158. The former are 29 more than in the previous week, and the latter are 28 more than in that week.

Deaths attributed to violent causes numbered 22. They are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·4, being 1°·5 above that for the previous week, but 5°·7 below that for the corresponding week of last year. The mean rainfall was 0·34 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 30. Week ending SATURDAY, JULY 29, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 29th July 1922 the births of 1132 living children, the deaths of 512 persons, and 431 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 524. The equivalent annual birth-rate is 24·9 per thousand, and the death-rate, corrected, 11·5.

The birth-rate for the week is 3·8 below that for the previous week, 1·9 below the mean of the rates for the three preceding weeks, and 2·8 below that for the corresponding week of last year. The death-rate for the week is 0·6 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 0·5 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·3 in Falkirk, 19·1 in Greenock, and 17·4 in Kilmarnock, to 5·1 in Dunfermline, 5·5 in Paisley, and 7·1 in Coatbridge. In Kirkcaldy it was 14·5, in Dundee 14·0, in Aberdeen 12·8, in Edinburgh 11·9, in Hamilton 11·9, in Glasgow 11·1, in Motherwell and Wishaw 9·0, in Perth 7·9, in Clydebank 7·7, and in Ayr 7·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 36. They are 12 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 12 from measles, 1 from scarlet fever, 7 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 6 more, but those from measles are 5 fewer, from whooping-cough 6 fewer, and from the diarrhoeas of childhood 7 fewer.

Deaths from influenza numbered 2. They are 1 more than in the previous week.

Deaths from respiratory diseases numbered 51. They are 15 fewer than in the previous week.

Deaths of children of less than one year old numbered 73, and those of persons of sixty-five and upwards 132. The former are 15 fewer than in the previous week, and the latter are 26 fewer than in that week.

Deaths attributed to violent causes numbered 23. They are 1 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 55°·3, being 1°·1 below that for the previous week, and 1°·0 below that for the corresponding week of last year. The mean rainfall was 0·54 inch.

Note:—Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of the sole cause. * Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 31. Week ending SATURDAY, AUGUST 5, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 5th August 1922 the births of 1089 living children, the deaths of 494 persons, and 421 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 494. The equivalent annual birth-rate is 24·0 per thousand, and the death-rate, corrected, 10·9.

The birth-rate for the week is 0·9 below that for the previous week, 2·5 below the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year. The death-rate for the week is 0·6 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 1·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Perth, 14·5 in Hamilton and 13·4 in Dundee, to 6·3 in Falkirk, 6·6 in Clydebank, and 7·2 in Ayr. In Kirkealdy it was 13·2, in Coatbridge 13·0, in Paisley 12·3, in Kilmarnock 11·6, in Glasgow 11·3, in Aberdeen and Dunfermline 10·2, in Motherwell and Wishaw 9·8, in Edinburgh 9·2, and in Greenock 8·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 34. They are 2 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 12 from measles, 6 from whooping-cough, 5 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 3 more, but those from whooping-cough are 1 fewer, and from diphtheria 3 fewer, while those from measles numbered the same. No deaths from enteric fever or from scarlet fever were registered during the week.

Deaths from influenza numbered 2. They are the same as in the previous week.

Deaths from respiratory diseases numbered 53. They are 2 more than in the previous week.

Deaths of children of less than one year old numbered 86, and those of persons of sixty-five and upwards 133. The former are 13 more than in the previous week, but the latter are the same as in that week.

Deaths attributed to violent causes numbered 27. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·4, being 0°·9 below that for the previous week, and 4°·4 below that for the corresponding week of last year. The mean rainfall was 0·67 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 32. Week ending SATURDAY, AUGUST 12, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 12th August 1922 the births of 1090 living children, the deaths of 488 persons, and 314 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 484. The equivalent annual birth-rate is 24·0 per thousand, and the death-rate, corrected, 10·6.

The birth-rate for the week is the same as that for the previous week, but 1·9 below the mean of the rates for the three preceding weeks, and 2·1 below that for the corresponding week of last year. The death-rate for the week is 0·3 below that for the previous week, 0·9 below the mean of the rates for the three preceding weeks, and 1·7 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·4 in Perth, 13·4 in Greenock, and 13·2 in Hamilton, to 2·2 in Clydebank, 7·8 in Falkirk, and 8·7 in Ayr. In Kilmarnock it was 13·1, in Edinburgh 12·5, in Dundee 10·9, in Coatbridge 10·7, in Aberdeen 10·5, in Motherwell and Wishaw 10·5, in Glasgow 10·0, in Paisley 9·2, in Kirkcaldy 9·2, and in Dunfermline 8·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 28. They are 6 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 4 from measles, 1 from scarlet fever, 7 from whooping-cough, 6 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever, whooping-cough and diphtheria are each 1 more, but those from the diarrhoeas of childhood are 1 fewer and from measles 8 fewer.

Deaths from influenza numbered 2. They are the same as in the previous week.

Deaths from respiratory diseases numbered 46. They are 7 fewer than in the previous week.

Deaths of children of less than one year old numbered 61, and those of persons of sixty-five and upwards 163. The former are 25 fewer than in the previous week, but the latter are 30 more than in that week.

Deaths attributed to violent causes numbered 10. They are 17 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·0, being 0°·4 below that for the previous week, and 1°·3 below that for the corresponding week of last year. The mean rainfall was 0·51 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 33. Week ending **SATURDAY, AUGUST 19, 1922.** Price **2d. net.**

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 19th August 1922 the births of 1118 living children, the deaths of 493 persons, and 311 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 483. The equivalent annual birth-rate is 24·6 per thousand, and the death-rate, corrected, 10·6.

The birth-rate for the week is 0·6 above that for the previous week, 0·3 above the mean of the rates for the three preceding weeks, and 0·3 above that for the corresponding week of last year. The death-rate for the week is the same as that for the previous week, but is 0·4 below the mean of the rates for the three preceding weeks, and 2·1 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·2 in Perth, 12·7 in Greenock, and 12·3 in Paisley, to 2·9 in Ayr, 4·4 in Clydebank, and 4·7 in Falkirk. In Aberdeen it was 11·5, in Motherwell and Wishaw 11·3, in Edinburgh 11·2, in Dundee 11·2, in Glasgow 10·7, in Kirkcaldy 10·5, in Dunfermline 10·2, in Kilmarnock 10·2, in Coatbridge 9·5, and in Hamilton, 6·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 24. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include 5 from measles, 4 from whooping-cough, 7 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 1 more, and from diphtheria 1 more, but those from the diarrhoeas of childhood are 2 fewer and from whooping-cough 3 fewer. No deaths were registered during the week from enteric fever or scarlet fever.

Deaths from influenza numbered 1. They are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 58. They are 12 more than in the previous week.

Deaths of children of less than one year old numbered 60, and those of persons of sixty-five and upwards 143. The former are 1 fewer than in the previous week, and the latter are 20 fewer than in that week.

Deaths attributed to violent causes numbered 12. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 55° 0, being 1° 0 above that for the previous week, but 1° 9 below that for the corresponding week of last year. The mean rainfall was 0·74 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 34. Week ending SATURDAY, AUGUST 26, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 26th August 1922 the births of 1100 living children, the deaths of 484 persons, and 317 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 476. The equivalent annual birth-rate is 24·2 per thousand, and the death-rate, corrected, 10·5.

The birth-rate for the week is 0·4 below that for the previous week, the same as the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 2·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·0 in Dunfermline, 12·6 in Edinburgh, and 11·8 in Coatbridge, to 2·9 in Kilmarnock, 2·9 in Ayr, and 3·7 in Paisley. In Glasgow it was 11·5, in Dundee 10·9, in Hamilton 10·6, in Motherwell and Wishaw 10·5, in Aberdeen 8·2, in Kirkcaldy 7·9, in Falkirk 7·8, in Greenock 7·6, in Perth 6·3, and in Clydebank 5·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 20. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·4 per thousand. These deaths include 4 from measles, 3 from scarlet fever, 3 from whooping-cough, 1 from diphtheria, and 9 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 3 more, and from the diarrhoeas of childhood 1 more, but those from measles are 1 fewer, from whooping-cough 1 fewer, and from diphtheria 6 fewer.

Deaths from influenza numbered 1. They are the same as in the previous week.

Deaths from respiratory diseases numbered 47. They are 11 fewer than in the previous week.

Deaths of children of less than one year old numbered 67, and those of persons of sixty-five and upwards 135. The former are 7 more than in the previous week, but the latter are 8 fewer than in that week.

Deaths attributed to violent causes numbered 20. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·1, being 0°·9 below that for the previous week, and 3°·3 below that for the corresponding week of last year. The mean rainfall was 0·50 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 35. Week ending SATURDAY, SEPTEMBER 2, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 2nd September 1922 the births of 1151 living children, the deaths of 486 persons, and 409 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 491. The equivalent annual birth-rate is 25·3 per thousand, and the death-rate, corrected, 10·8.

The birth-rate for the week is 1·1 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, and 1·0 above that for the corresponding week of last year. The death-rate for the week is 0·3 above that for the previous week, and 0·2 above the mean of the rates for the three preceding weeks, but is 1·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·3 in Kilmarnock, 15·8 in Hamilton, and 15·4 in Coatbridge, to 4·7 in Falkirk, 6·4 in Dunfermline, and 7·7 in Clydebank. In Ayr it was 14·5, in Kirkcaldy 13·2, in Dundee 12·8, in Greenock 11·5, in Motherwell and Wishaw 11·3, in Glasgow 10·8, in Edinburgh 10·3, in Perth 9·5, in Aberdeen 8·9, and in Paisley 8·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 24. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include 1 from enteric fever, 6 from measles, 1 from scarlet fever, 10 from whooping-cough, 1 from diphtheria, and 5 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 7 more, from measles 2 more, and from enteric fever 1 more, but those from diphtheria number the same, while those from scarlet fever are 2 fewer, and those from the diarrhoeas of childhood are 4 fewer.

Deaths from influenza numbered 1. They are the same as in the previous week.

Deaths from respiratory diseases numbered 49. They are 2 more than in the previous week.

Deaths of children of less than one year old numbered 66, and those of persons of sixty-five and upwards 159. The former are 1 fewer than in the previous week, but the latter are 24 more than in that week.

Deaths attributed to violent causes numbered 28. They are 8 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 56°·0, being 1°·9 above that for the previous week, and 2°·9 above that for the corresponding week of last year. The mean rainfall was 0·50 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 36. Week ending SATURDAY, SEPTEMBER 9, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 9th September 1922 the births of 1031 living children, the deaths of 498 persons, and 436 marriages. The weekly number of deaths, corrected by the exclusion of those of non-residents, and by the inclusion of those of residents dying elsewhere in Scotland, is 484. The equivalent annual birth-rate is 22·7 per thousand, and the death-rate, corrected, 10·6.

The birth-rate for the week is 2·6 below that for the previous week, 2·0 below the mean of the rates for the three preceding weeks, and 5·0 below that for the corresponding week of last year. The death-rate for the week is 0·2 below that for the previous week, is the same as the mean of the rates for the three preceding weeks, but 2·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 25·3 in Perth, 15·8 in Kirkcaldy, and 13·4 in Greenock, to 5·8 in Ayr and in Kilmarnock, and 6·3 in Falkirk. In Paisley it was 11·7, in Dundee 11·5, 11·3 in Glasgow, 9·8 in Motherwell and Wishaw, 9·4 in Edinburgh, 9·2 in Aberdeen, 8·3 in Coatbridge, 7·9 in Hamilton, 7·7 in Clydebank, and 7·6 in Dunfermline.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 23. They are 1 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include 4 from measles, 1 from scarlet fever, 7 from whooping-cough, 1 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 5 more, but those from scarlet fever and diphtheria number the same, while those from measles are 2 fewer, and those from whooping-cough 3 fewer.

Deaths from influenza numbered 3. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 52. They are 3 more than in the previous week.

Deaths of children of less than one year old numbered 62, and those of persons of sixty-five and upwards 141. The former are 4 fewer than in the previous week, but the latter are 18 fewer than in that week.

Deaths attributed to violent causes numbered 30. They are 2 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 54°·5, being 1°·5 below that for the previous week, and 5°·7 below that for the corresponding week of last year. The mean rainfall was 0·06 inch.

No. 37. Week ending SATURDAY, SEPTEMBER 16, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600 there were registered during the week ending 16th September 1922 the births of 1081 living children, the deaths of 525 persons, and 365 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 507. The equivalent annual birth-rate is 23·8 per thousand and the death-rate corrected 11·2.

The birth-rate for the week is 1·1 above that for the previous week, but is 0·3 below the mean of the rates for the three preceding weeks, and 1·9 below that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, 0·6 above the mean of the rates for the three preceding weeks, and 0·1 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·2 in Perth, 14·1 in Falkirk, and 12·8 in Dundee, to 3·8 in Dunfermline, 3·9 in Kirkcaldy, and 6·6 in Clydebank. In Greenock it was 12·1, in Glasgow 12·0, in Hamilton 11·9, in Coatbridge 11·8, in Ayr 11·6, in Aberdeen 11·2, in Paisley 11·0, in Edinburgh 10·5, in Kilmarnock 8·7, and in Motherwell and Wishaw 6·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 21. They are 2 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·5 per thousand. These deaths include 1 from enteric fever, 1 from scarlet fever, 8 from whooping-cough, 5 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 4 more, from enteric fever 1 more, and from whooping-cough 1 more, while those from scarlet fever number the same, and those from the diarrhoeas of childhood are 4 fewer.

Deaths from influenza numbered 1. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 73. They are 21 more than in the previous week.

Deaths of children of less than one year old numbered 75, and those of persons of sixty-five and upwards 145. The former are 13 more than in the previous week, and the latter are 3 more than in that week.

Deaths attributed to violent causes numbered 23. They are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 52°·1, being 2°·4 below that for the previous week, but 1°·6 above that for the corresponding week of last year. The mean rainfall was 0·59 inch.

* Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 38. Week ending SATURDAY, SEPTEMBER 23, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600 there were registered during the week ending 23rd September 1922 the births of 1092 living children, the deaths of 531 persons, and 451 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 512. The equivalent annual birth-rate is 24·0 per thousand and the death-rate corrected 11·3.

The birth-rate for the week is 0·2 above that for the previous week, 0·1 above the mean of the rates for the three preceding weeks, but 3·4 below that for the corresponding week of last year. The death-rate for the week is 0·1 above that for the previous week, 0·4 above the mean of the rates for the three preceding weeks, but 2·0 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 17·2 in Hamilton, 15·3 in Greenock, and 14·5 in Kilmarnock, to 6·0 in Motherwell and Wishaw, 6·4 in Dunfermline, and 6·6 in Kirkcaldy. In Perth it was 14·2, in Aberdeen 14·1, in Edinburgh 12·5, in Glasgow 11·3, in Coatbridge 10·7, in Dundee 9·0, in Paisley 8·6, in Falkirk 7·8, in Clydebank 7·7, and in Ayr 7·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 38. They are 17 more than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 7 from measles, 4 from scarlet fever, 8 from whooping-cough, 4 from diphtheria, and 15 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from the diarrhoeas of childhood are 9 more, from measles 7 more, and from scarlet fever 3 more, while those from whooping-cough number the same, and those from diphtheria are 1 fewer.

Deaths from influenza numbered 3. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 63. They are 10 fewer than in the previous week.

Deaths of children of less than one year old numbered 97, and those of persons of sixty-five and upwards 157. The former are 22 more than in the previous week, and the latter are 12 more than in that week.

Deaths attributed to violent causes numbered 22. They are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·1, being 2°·0 below that for the previous week, and 5°·2 below that for the corresponding week of last year. The mean rainfall was 0·58 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 39. Week ending SATURDAY, SEPTEMBER 30, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 30th September 1922 the births of 1051 living children, the deaths of 510 persons, and 473 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 508. The equivalent annual birth-rate is 23·1 per thousand and the death-rate corrected 11·2.

The birth-rate for the week is 0·9 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, and 3·1 below that for the corresponding week of last year. The death-rate for the week is 0·1 below that for the previous week, and 0·3 below that for the corresponding week of last year, but is 0·2 above the mean of the rates for the three preceding weeks.

In the individual towns the death-rate ranged from 14·2 in Perth, 14·0 in Dunfermline, and 13·0 in Ayr, to 3·9 in Kirkealdy, 5·5 in Clydebank, and 6·6 in Hamilton. In Aberdeen it was 12·2, in Glasgow 11·8, in Edinburgh 11·8, in Motherwell and Wishaw 11·3, in Paisley 11·0, in Greenock 10·8, in Kilmarnock 10·2, in Falkirk 9·4, in Dundee 9·0, and in Coatbridge 8·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26. They are 12 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 4 from measles, 2 from scarlet fever, 7 from whooping-cough, 3 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 fewer, from diphtheria 1 fewer, from scarlet fever 2 fewer, from measles 3 fewer, and from the diarrhoeas of childhood 5 fewer.

Deaths from influenza numbered 1. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 72. They are 9 more than in the previous week.

Deaths of children of less than one year old numbered 81, and those of persons of sixty-five and upwards 155. The former are 16 fewer than in the previous week, and the latter are 2 fewer than in that week.

Deaths attributed to violent causes numbered 14. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·0, being 0°·9 above that for the previous week, but 4°·0 below that for the corresponding week of last year. The mean rainfall was 1·02 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 40. Week ending SATURDAY, OCTOBER 7, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 7th October 1922 the births of 1145 living children, the deaths of 500 persons, and 474 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 495. The equivalent annual birth-rate is 25·2 per thousand and the death-rate corrected 10·9.

The birth-rate for the week is 2·1 above that for the previous week, 1·6 above the mean of the rates for the three preceding weeks, but 2·4 below that for the corresponding week of last year. The death-rate for the week is 0·3 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 1·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 14·1 in Aberdeen, 12·7 in Dunfermline, and 12·4 in Dundee, to 1·6 in Perth, 5·3 in Hamilton, and 5·3 in Motherwell and Wishaw. In Glasgow it was 12·2, in Coatbridge 10·7, in Ayr 10·1, in Edinburgh 9·9, in Greenock 9·6, in Paisley 9·2, in Kirkcaldy 9·2, in Falkirk 7·8, in Clydebank 6·6, and in Kilmarnock 5·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 26. They are the same as in the previous week, and are equal to an annual death-rate from these causes of 0·6 per thousand. These deaths include 2 from enteric fever, 3 from measles, 3 from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 2 more, from scarlet fever 1 more, and from the diarrhoeas of childhood 1 more, but those from diphtheria number the same, while those from measles are 1 fewer, and from whooping-cough 3 fewer.

Deaths from influenza numbered 2. They are 1 more than in the previous week.

Deaths from respiratory diseases numbered 72. They are the same as in the previous week.

Deaths of children of less than one year old numbered 68, and those of persons of sixty-five and upwards 151. The former are 13 fewer than in the previous week, and the latter are 4 fewer than in that week.

Deaths attributed to violent causes numbered 29. They are 15 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 51°·6, being 0°·6 above that for the previous week, but 3°·5 below that for the corresponding week of last year. The mean rainfall was 1·10 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 41. Week ending SATURDAY, OCTOBER 14, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 14th October 1922 the births of 1094 living children, the deaths of 526 persons, and 314 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 526. The equivalent annual birth-rate is 24·1 per thousand and the death-rate corrected 11·6.

The birth-rate for the week is 1·1 below that for the previous week, the same as the mean of the rates for the three preceding weeks, but 4·4 below that for the corresponding week of last year. The death-rate for the week is 0·7 above that for the previous week, 0·5 above the mean of the rates for the three preceding weeks, but 1·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 16·0 in Kilmarnock, 15·0 in Motherwell and Wishaw, and 14·2 in Coatbridge, to 5·8 in Ayr, 7·4 in Paisley, and 7·6 in Dunfermline. In Glasgow it was 12·6, in Perth 12·6, in Aberdeen 12·5, in Greenock 11·5, in Dundee 10·9, in Edinburgh 10·5, in Clydebank 9·9, in Hamilton 9·2, in Kirkealdy 7·9, and in Falkirk 7·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 30. They are 4 more than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 4 from measles, 4 from scarlet fever, 2 from whooping-cough, 8 from diphtheria, and 12 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 5 more, from measles 1 more, from scarlet fever 1 more, and from the diarrhoeas of childhood 1 more, but those from whooping-cough are 2 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 3. They are 1 more than in the previous week.

Deaths from respiratory diseases numbered 53. They are 19 fewer than in the previous week.

Deaths of children of less than one year old numbered 88, and those of persons of sixty-five and upwards 149. The former are 20 more than in the previous week, but the latter are 2 fewer than in that week.

Deaths attributed to violent causes numbered 22. They are 7 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 50°·1, being 1°·5 below that for the previous week, and 4°·6 below that for the corresponding week of last year. The mean rainfall was 0·36 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 42. Week ending SATURDAY, OCTOBER 21, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 21st October 1922 the births of 1081 living children, the deaths of 560 persons, and 321 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 554. The equivalent annual birth-rate is 23·8 per thousand and the death-rate corrected 12·2.

The birth-rate for the week is 0·3 below that for the previous week, 0·3 below the mean of the rates for the three preceding weeks, and 3·8 below that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, 1·0 above the mean of the rates for the three preceding weeks, but 0·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·0 in Perth, 16·4 in Aberdeen, and 14·7 in Paisley, to 7·2 in Ayr, 7·7 in Clydebank, and 7·9 in Hamilton. In Kirkcaldy it was 14·5, in Dunfermline 14·0, in Falkirk 12·5, in Glasgow 12·4, in Edinburgh 11·7, in Greenock 11·5, in Dundee 11·2, in Kilmarnock 10·2, in Motherwell and Wishaw 8·3, and in Coatbridge 8·3.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 19 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 12 from measles, 5 from scarlet fever, 8 from whooping-cough, 5 from diphtheria, and 19 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 8 more, from the diarrhoeas of childhood 7 more, from whooping-cough 6 more, and from scarlet fever 1 more, but those from diphtheria are 3 fewer.

Deaths from influenza numbered 2. They are 1 fewer than in the previous week.

Deaths from respiratory diseases numbered 81. They are 28 more than in the previous week.

Deaths of children of less than one year old numbered 90, and those of persons of sixty-five and upwards 168. The former are 2 more than in the previous week, and the latter are 19 more than in that week.

Deaths attributed to violent causes numbered 19. They are 3 fewer than in the previous week.

The mean temperature for six of the towns named in the Table was 48°·2, being 1°·9 below that for the previous week, and 2°·9 below that for the corresponding week of last year. The mean rainfall was 0·05 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 43. Week ending SATURDAY, OCTOBER 28, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 28th October 1922 the births of 990 living children, the deaths of 609 persons, and 322 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 592. The equivalent annual birth-rate is 21·8 per thousand and the death-rate corrected 13·0.

The birth-rate for the week is 2·0 below that for the previous week, 2·6 below the mean of the rates for the three preceding weeks, and 3·6 below that for the corresponding week of last year. The death-rate for the week is 0·8 above that for the previous week, 1·4 above the mean of the rates for the three preceding weeks, but 0·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 15·8 in Aberdeen, 15·5 in Edinburgh, and 14·0 in Dunfermline, to 6·3 in Falkirk, 6·6 in Hamilton, and 7·6 in Greenock. In Dundee it was 13·4, in Glasgow 13·2, in Clydebank 13·2, in Kilmarnock 13·1, in Coatbridge 13·0, in Kirkcaldy 10·5, in Ayr 10·1, in Paisley 9·8, in Motherwell and Wishaw 9·8, and in Perth 9·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 36. They are 13 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·8 per thousand. These deaths include 1 from enteric fever, 11 from measles, 4 from scarlet fever, 4 from whooping-cough, 3 from diphtheria, and 13 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from enteric fever are 1 more, but those from the diarrhoeas of childhood are 6 fewer, from whooping-cough 4 fewer, from diphtheria 2 fewer, from measles 1 fewer, and from scarlet fever 1 fewer.

Deaths from influenza numbered 5. They are 3 more than in the previous week.

Deaths from respiratory diseases numbered 95. They are 14 more than in the previous week.

Deaths of children of less than one year old numbered 107, and those of persons of sixty-five and upwards 164. The former are 17 more than in the previous week, but the latter are 4 fewer than in that week.

Deaths attributed to violent causes numbered 25. They are 6 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 40°·7, being 7°·5 below that for the previous week, and 8°·2 below that for the corresponding week of last year. The mean rainfall was 0·09 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 44. Week ending SATURDAY, NOVEMBER 4, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 4th November 1922 the births of 969 living children, the deaths of 643 persons, and 411 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 632. The equivalent annual birth-rate is 21·3 per thousand and the death-rate corrected 13·9.

The birth-rate for the week is 0·5 below that for the previous week, 1·9 below the mean of the rates for the three preceding weeks, and 2·9 below that for the corresponding week of last year. The death-rate for the week is 0·9 above that for the previous week, 1·6 above the mean of the rates for the three preceding weeks, and 0·4 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·4 in Aberdeen, 18·4 in Kirkcaldy, and 15·8 in Perth, to 7·6 in Dunfermline, 8·8 in Clydebank, and 9·2 in Paisley. In Glasgow it was 14·8, in Falkirk 14·1, in Dundee 13·7, in Edinburgh 13·1, in Kilmarnock 13·1, in Motherwell and Wishaw 12·8, in Greenock 12·1, in Coatbridge 10·7, in Hamilton 10·6, and in Ayr 10·1.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 32. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 0·7 per thousand. These deaths include 13 from measles, 5 from scarlet fever, 8 from whooping-cough, 2 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 4 more, from measles 2 more, and from scarlet fever 1 more, but those from diphtheria are 1 fewer, and from the diarrhoeas of childhood 9 fewer.

Deaths from influenza numbered 7. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 132. They are 37 more than in the previous week.

Deaths of children of less than one year old numbered 108, and those of persons of sixty-five and upwards 198. The former are 1 more than in the previous week, and the latter are 34 more than in that week.

Deaths attributed to violent causes numbered 19. They are 6 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 37°·2, being 3°·5 below that for the previous week, and 7°·8 below that for the corresponding week of last year. The mean rainfall was 0·97 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 45. Week ending SATURDAY, NOVEMBER 11, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 11th November 1922 the births of 936 living children, the deaths of 703 persons, and 277 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 677. The equivalent annual birth-rate is 20·6 per thousand and the death-rate corrected 14·9.

The birth-rate for the week is 0·7 below that for the previous week, 1·7 below the mean of the rates for the three preceding weeks, and 4·3 below that for the corresponding week of last year. The death-rate for the week is 1·0 above that for the previous week, 1·9 above the mean of the rates for the three preceding weeks, and 2·0 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 26·1 in Kilmarnock, 21·7 in Aberdeen, and 15·5 in Glasgow, to 2·9 in Ayr, 6·6 in Hamilton, and 12·1 in Clydebank. In Paisley it was 15·3, in Dunfermline 15·3, in Kirkcaldy 14·5, in Perth 14·2, in Falkirk 14·1, in Dundee 13·7, in Greenock 13·4, in Edinburgh 13·3, in Coatbridge 13·0, and in Motherwell and Wishaw 12·8.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 50. They are 18 more than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 22 from measles, 1 from scarlet fever, 10 from whooping-cough, 7 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 9 more, from the diarrhoeas of childhood 6 more, from diphtheria 5 more, and from whooping-cough 2 more, but those from scarlet fever are 4 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 9. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 130. They are 2 fewer than in the previous week.

Deaths of children of less than one year old numbered 110, and those of persons of sixty-five and upwards 211. The former are 2 more than in the previous week, and the latter are 13 more than in that week.

Deaths attributed to violent causes numbered 18. They are 1 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·2, being 5°·0 above that for the previous week, and 5°·0 above that for the corresponding week of last year. The mean rainfall was 1·45 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 46. Week ending SATURDAY, NOVEMBER 18, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 18th November 1922 the births of 1045 living children, the deaths of 718 persons, and 282 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 704. The equivalent annual birth-rate is 23·0 per thousand and the death-rate corrected 15·5.

The birth-rate for the week is 2·4 above that for the previous week, and 1·8 above the mean of the rates for the three preceding weeks, but is 3·2 below that for the corresponding week of last year. The death-rate for the week is 0·6 above that for the previous week, and 1·6 above the mean of the rates for the three preceding weeks, but is 0·3 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 20·5 in Perth, 18·7 in Dundee, and 17·0 in Edinburgh, to 11·8 in Kirkcaldy, 12·1 in Clydebank, and 12·7 in Dunfermline. In Coatbridge it was 16·6, in Kilmarnock 16·0, in Ayr 15·9, in Motherwell and Wishaw 15·8, in Hamilton 15·8, in Glasgow 15·0, in Aberdeen 14·8, in Falkirk 14·1, in Greenock 14·0, and in Paisley 12·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 60. They are 10 more than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include 2 from enteric fever, 19 from measles, 8 from scarlet fever, 14 from whooping-cough, 7 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from scarlet fever are 8 more, from whooping-cough 4 more, and from enteric fever 2 more, while those from diphtheria and from the diarrhoeas of childhood number the same, and those from measles are 3 fewer.

Deaths from influenza numbered 7. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 160. They are 30 more than in the previous week.

Deaths of children of less than one year old numbered 123, and those of persons of sixty-five and upwards 209. The former are 13 more than in the previous week, but the latter are 2 fewer than in that week.

Deaths attributed to violent causes numbered 27. They are 9 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 46°·9, being 4°·7 above that for the previous week, and 4°·9 above that for the corresponding week of last year. The mean rainfall was 0·05 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 47. Week ending SATURDAY, NOVEMBER 25, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 25th November 1922 the births of 1038 living children, the deaths of 690 persons, and 280 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 663. The equivalent annual birth-rate is 22·8 per thousand and the death-rate corrected 14·6.

The birth-rate for the week is 0·2 below that for the previous week, and 2·3 below that for the corresponding week of last year, but is 1·2 above the mean of the rates for the three preceding weeks. The death-rate for the week is 0·9 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 0·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 18·9 in Kilmarnock, 16·6 in Greenock, and 15·9 in Glasgow, to 6·6 in Kirkcaldy, 8·8 in Clydebank, and 9·0 in Motherwell and Wishaw. In Aberdeen it was 15·8, in Hamilton 14·5, in Perth 14·2, in Paisley 14·1, in Edinburgh 14·0, in Dundee 13·1, in Coatbridge 13·0, in Dunfermline 12·7, in Falkirk 12·5, and in Ayr 11·6.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 49. They are 11 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·1 per thousand. These deaths include 2 from enteric fever, 11 from measles, 6 from scarlet fever, 15 from whooping-cough, 7 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 more, but those from enteric fever and from diphtheria number the same, while those from scarlet fever are 2 fewer, from the diarrhoeas of childhood 2 fewer, and from measles 8 fewer.

Deaths from influenza numbered 10. They are 3 more than in the previous week.

Deaths from respiratory diseases numbered 143. They are 17 fewer than in the previous week.

Deaths of children of less than one year old numbered 110, and those of persons of sixty-five and upwards 200. The former are 13 fewer than in the previous week, and the latter are 9 fewer than in that week.

Deaths attributed to violent causes numbered 32. They are 5 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·7, being 4°·2 below that for the previous week, but 1°·2 above that for the corresponding week of last year. The mean rainfall was 0·17 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 48. Week ending SATURDAY, DECEMBER 2, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 2nd December 1922 the births of 1071 living children, the deaths of 735 persons, and 367 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 696. The equivalent annual birth-rate is 23·6 per thousand and the death-rate corrected 15·3.

The birth-rate for the week is 0·8 above that for the previous week, and 1·5 above the mean of the rates for the three preceding weeks, but is 1·8 below that for the corresponding week of last year. The death-rate for the week is 0·7 above that for the previous week, and 0·3 above the mean of the rates for the three preceding weeks, but is 0·2 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·7 in Aberdeen, 18·7 in Dundee, and 17·8 in Coatbridge, to 9·2 in Hamilton, 9·4 in Falkirk, and 10·1 in Ayr. In Paisley it was 16·6, in Glasgow 16·2, in Kilmarnock 16·0, in Greenock 15·9, in Perth 15·8, in Clydebank 15·4, in Kirkcaldy 13·2, in Motherwell and Wishaw 12·0, in Edinburgh 11·9, and in Dunfermline 11·5.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 59. They are 10 more than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include 1 from enteric fever, 17 from measles, 3 from scarlet fever, 13 from whooping-cough, 14 from diphtheria, and 11 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from diphtheria are 7 more, from measles 6 more, and from the diarrhoeas of childhood 3 more, but those from enteric fever are 1 fewer, from whooping-cough 2 fewer, and from scarlet fever 3 fewer.

Deaths from influenza numbered 8. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 150. They are 7 more than in the previous week.

Deaths of children of less than one year old numbered 154, and those of persons of sixty-five and upwards 189. The former are 44 more than in the previous week, but the latter are 11 fewer than in that week.

Deaths attributed to violent causes numbered 24. They are 8 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 45°·3, being 2°·6 above that for the previous week, and 4°·5 above that for the corresponding week of last year. The mean rainfall was 0·28 inch.

Note :— Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.

* Cerebro-spinal meningitis.

WEEKLY RETURN

OF

BIRTHS, DEATHS, & MARRIAGES

IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 49. Week ending SATURDAY, DECEMBER 9, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 9th December 1922 the births of 1042 living children, the deaths of 680 persons, and 315 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 631. The equivalent annual birth-rate is 22·9 per thousand and the death-rate corrected 13·9.

The birth-rate for the week is 0·7 below that for the previous week, 0·2 below the mean of the rates for the three preceding weeks, and 2·5 below that for the corresponding week of last year. The death-rate for the week is 1·4 below that for the previous week, 1·2 below the mean of the rates for the three preceding weeks, and 1·8 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 23·2 in Kilmarnock, 18·7 in Aberdeen and 15·8 in Perth, to 10·2 in Dunfermline, 10·5 in Kirkcaldy, and 10·6 in Hamilton. In Coatbridge it was 14·2, in Falkirk 14·1, in Glasgow 14·0, in Dundee 13·7, in Paisley 13·5, in Edinburgh 13·0, in Greenock 12·7, in Motherwell and Wishaw 12·0, in Ayr 11·6, and in Clydebank 11·0.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 55. They are 4 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 22 from measles, 5 from scarlet fever, 8 from whooping-cough, 9 from diphtheria, and 10 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 5 more, and from scarlet fever 2 more, while those from enteric fever number the same, and those from the diarrhoeas of childhood are 1 fewer, from whooping-cough 5 fewer, and from diphtheria 5 fewer.

Deaths from influenza numbered 4. They are 4 fewer than in the previous week.

Deaths from respiratory diseases numbered 121. They are 29 fewer than in the previous week.

Deaths of children of less than one year old numbered 132, and those of persons of sixty-five and upwards 181. The former are 22 fewer than in the previous week, and the latter are 8 fewer than in that week.

Deaths attributed to violent causes numbered 20. They are 4 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 44°·3, being 1°·0 below that for the previous week, and 1°·8 below that for the corresponding week of last year. The mean rainfall was 0·21 inch.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 50. Week ending SATURDAY, DECEMBER 16, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 16th December 1922 the births of 1121 living children, the deaths of 731 persons, and 262 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 705. The equivalent annual birth-rate is 24·7 per thousand and the death-rate corrected 15·5.

The birth-rate for the week is 1·8 above that for the previous week, 1·6 above the mean of the rates for the three preceding weeks, but 1·4 below that for the corresponding week of last year. The death-rate for the week is 1·6 above that for the previous week, 0·9 above the mean of the rates for the three preceding weeks, and 1·4 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·5 in Dundee, 21·4 in Aberdeen, and 18·4 in Paisley, to 5·8 in Ayr, 7·9 in Perth, and 8·7 in Kilmarnock. In Motherwell and Wishaw it was 18·1, in Greenock 17·2, in Glasgow 16·5, in Clydebank 15·4, in Coatbridge 15·4, in Edinburgh 11·2, in Falkirk 11·0, in Hamilton 10·6, in Kirkcaldy 9·2, and in Dunfermline 8·9.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 61. They are 6 more than in the previous week, and are equal to an annual death-rate from these causes of 1·3 per thousand. These deaths include 1 from enteric fever, 27 from measles, 5 from scarlet fever, 12 from whooping-cough, 8 from diphtheria, and 8 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 5 more, and from whooping-cough 4 more, but those from enteric fever and from scarlet fever number the same, while those from diphtheria are 1 fewer, and from the diarrhoeas of childhood 2 fewer.

Deaths from influenza numbered 5. They are 1 more than in the previous week.

Deaths from respiratory diseases numbered 145. They are 24 more than in the previous week.

Deaths of children of less than one year old numbered 141, and those of persons of sixty-five and upwards 198. The former are 9 more than in the previous week, and the latter are 17 more than in that week.

Deaths attributed to violent causes numbered 24. They are 4 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 42°·0, being 2°·3 below that for the previous week, and 2°·4 below that for the corresponding week of last year. The mean rainfall was 0·63 inch

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 51. Week ending SATURDAY, DECEMBER 23, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 23rd December 1922 the births of 1209 living children, the deaths of 680 persons, and 360 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 658. The equivalent annual birth-rate is 26·6 per thousand and the death-rate corrected 14·5.

The birth-rate for the week is 1·9 above that for the previous week, 2·9 above the mean of the rates for the three preceding weeks, and 0·3 above that for the corresponding week of last year. The death-rate for the week is 1·0 below that for the previous week, 0·4 below the mean of the rates for the three preceding weeks, but 0·2 above that for the corresponding week of last year.

In the individual towns the death-rate ranged from 19·3 in Dundee, 15·4 in Clydebank and in Coatbridge, to 4·7 in Perth, 6·3 in Falkirk and 10·1 in Ayr. In Dunfermline it was 15·3, in Motherwell and Wishaw 15·0, in Edinburgh 14·9, in Glasgow 14·8, in Aberdeen 13·8, in Paisley 12·9, in Greenock 12·7, in Hamilton 11·9, in Kirkcaldy 11·8, and in Kilmarnock 10·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 46. They are 15 fewer than in the previous week, and are equal to an annual death-rate from these causes of 1·0 per thousand. These deaths include 17 from measles, 4 from scarlet fever, 13 from whooping-cough, 6 from diphtheria, and 6 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from whooping-cough are 1 more, while those from measles are 10 fewer, from diphtheria and from the diarrhoeas of childhood each 2 fewer, and from scarlet fever 1 fewer. No deaths from enteric fever were registered during the week.

Deaths from influenza numbered 3. They are 2 fewer than in the previous week.

Deaths from respiratory diseases numbered 139. They are 6 fewer than in the previous week.

Deaths of children of less than one year old numbered 131, and those of persons of sixty-five and upwards 172. The former are 10 fewer than in the previous week, and the latter are 26 fewer than in that week.

Deaths attributed to violent causes numbered 21. They are 3 fewer than in the previous week.

The mean temperature for seven of the towns named in the Table was 39°·2, being 2°·8 below that for the previous week, and 2°·8 below that for the corresponding week of last year. The mean rainfall was 1·04 inch.

Note :— Death Numbers (except those in Col. 5) and rates are corrected by the deduction of deaths of Non-Residents domiciled in Scotland, and by the addition of deaths of Residents reported from elsewhere in Scotland during the week. Numbers in Col. 20 include deaths of which Influenza was a contributory cause as well as those of which it was the sole cause.
* Cerebro-spinal meningitis.

WEEKLY RETURN
OF
BIRTHS, DEATHS, & MARRIAGES
IN THE PRINCIPAL TOWNS OF
SCOTLAND.

By Authority of the Registrar-General.

No. 52. Week ending SATURDAY, DECEMBER 30, 1922. Price 2d. net.

In the Sixteen Principal Towns of Scotland, which collectively have an estimated population of 2,370,600, there were registered during the week ending 30th December 1922 the births of 1151 living children, the deaths of 706 persons, and 766 marriages. The weekly number of deaths corrected by the exclusion of those of non-residents and by the inclusion of those of residents dying elsewhere in Scotland is 679. The equivalent annual birth-rate is 25·3 per thousand and the death-rate corrected 14·9.

The birth-rate for the week is 1·3 below that for the previous week, and 1·6 below that for the corresponding week of last year, but is 0·6 above the mean of the rates for the three preceding weeks. The death-rate for the week is 0·4 above that for the previous week, and 0·3 above the mean of the rates for the three preceding weeks, but is 0·4 below that for the corresponding week of last year.

In the individual towns the death-rate ranged from 21·7 in Ayr, 21·2 in Dundee, and 17·2 in Paisley and in Hamilton, to 10·2 in Dunfermline, 12·6 in Perth, and 12·7 in Greenock. In Motherwell and Wishaw it was 16·6, in Aberdeen 16·4, in Kilmarnock 16·0, in Coatbridge 15·4, in Edinburgh 14·8, in Kirkcaldy 14·5, in Falkirk 14·1, in Glasgow 13·7, and in Clydebank 13·2.

Deaths from the principal epidemic diseases, those named in columns 13 to 18 of the Table, numbered 53. They are 7 more than in the previous week, and are equal to an annual death-rate from these causes of 1·2 per thousand. These deaths include 1 from enteric fever, 21 from measles, 4 from scarlet fever, 15 from whooping-cough, 8 from diphtheria, and 4 from the diarrhoeas of childhood. Compared with the returns for the previous week, deaths from measles are 4 more, and from whooping-cough and diphtheria each 2 more, while those from scarlet fever number the same, but those from the diarrhoeas of childhood are 2 fewer.

Deaths from influenza numbered 5. They are 2 more than in the previous week.

Deaths from respiratory diseases numbered 144. They are 5 more than in the previous week.

Deaths of children of less than one year old numbered 127, and those of persons of sixty-five and upwards 191. The former are 4 fewer than in the previous week, but the latter are 19 more than in that week.

Deaths attributed to violent causes numbered 24. They are 3 more than in the previous week.

The mean temperature for seven of the towns named in the Table was 38°·8, being 0°·4 below that for the previous week, and 2°·6 below that for the corresponding week of last year. The mean rainfall was 1·57 inch.
